

# Guidelines for On-the-Set Productions\*

Exposure Prevention of COVID-19 and other flu-like viruses

## Cast and Crew Personal Responsibilities

- If you have a temperature, feeling sick or a dry cough, don't come in. You will be sent home by the medic before your day starts.
- Persons with increased risk factors should consider avoiding public and private gatherings of 25+. If unavoidable, wearing a mask is advised. *(We do not have masks, so you will need to bring your own)*  
Persons with increased risk factors include:
  - Those 60 years or older.
    - Studies show people over 60 are more susceptible. Know your health status.
  - Those with immune deficiencies.
  - If you live with persons who are 60 years or older or who are immune-deficient
    - Consider your risks of bringing anything home, COVID, FLU, etc.
  - People who have serious chronic medical conditions like:
    - Diabetes
    - Lung, kidney or Heart disease
- Personal Protection
  - **Wash your hands often** with soap and water for at least **20 seconds**, especially after blowing your nose, coughing, or sneezing, or having been in a public place.
  - **Avoid touching** your face, nose, eyes, etc.
  - **Clean and disinfect** your personal equipment and property around you to remove germs: practice routine cleaning of frequently touched surfaces (for example: tables, doorknobs, light switches, handles, desks, toilets, faucets, sinks & cell phones)

## Medic Procedures Best Practices

- Each person should be tested in the morning by our medic before going on set and if symptoms appear. We will test for:
  - Temperature
  - Dry Cough
  - Shortness of breath
- If a person has a temp of 100.0 or higher, they will be sent home immediately regardless of any other symptoms
- Any suspected ill person should maintain a 6-foot distance from other cast and crew.
- Each person should be given a wrist band or hand stamp to show they have been checked.

## Production Suggested Procedures

- One PA wipes down all surfaces every hour with appropriate wipes
- All food servers wear gloves
  - Disposable everything, dishes, forks, etc.
- Provide additional hand washing stations / Hand sanitizer stations
- Provide good air flow at all times possible
